[Lenovo 5100 3.5" 3.84 TB Serial ATA III:](#)

The 5100 Enterprise Mainstream SATA solid-state drives (SSDs) use Micron NAND flash memory technology with a SATA 6Gbps interface. They provide an affordable solution for mixed read/write applications such as excellent choice as cache in transactional application and high-speed storage for enterprise databases.

The 5100 Series of SATA SSDs is available from Lenovo in two levels of endurance. The Enterprise Mainstream SSDs covered in this product guide offer drive write endurance of between 2.5 and 5.0 total drive writes per day (DWPD) whereas the Enterprise Entry SSDs covered in LP0633 are more for read-intensive workloads and offer write endurance of under 1.0 DWPD.

Rigorous testing of the 5100 Series SSDs by Lenovo through the ServerProven program assures a high degree of storage subsystem compatibility and reliability. Providing additional peace of mind, these drives are covered under Lenovo warranty.
