HP LPe1605 16Gb Fibre Channel Host Bus Adapter for BladeSystem c-Class

[HP LPe1605 16Gb Fibre Channel Host Bus Adapter for BladeSystem c-Class:](#)

The HP LPe1605 16Gb mezzanine Fibre Channel Host Bus Adapter provides superior reliability, exceptional performance, enhanced security, server side NPIV, and scalable management for virtual server and enterprise-class applications. This latest FC HBA delivers twice the I/O performance of 8Gb FC HBAs which is critical for mission critical applications that rely on highly available connectivity. Emulex's firmware architecture allows firmware to be upgraded without taking the server off-line or re-booting, and without the need to upgrade the driver. As with all Emulex LightPulse Fibre Channel HBAs, the HP LPe1605 is managed with Emulex OneCommand™ Manager (OCM). This provides a secure, centralized administration console to discover and manage Emulex Fibre Channel HBAs on local and remote hosts.
