

## Intel AXXRMM3 remote management adapter

**Brand :** Intel

**Product code:** AXXRMM3

**Product name :** AXXRMM3

Remote Management Module 3

[Intel AXXRMM3 remote management adapter:](#)

The Intel RMM3 is a 1.23-inch x 2.30-inch printed circuit board. When installed onto the Intel RMM connector on Intel server boards, it provides an increased level of manageability over basic server management available to the server board. Designed to work with the Integrated Baseboard Management Controller (BMC), this small form-factor mezzanine card enables graphical server control from anywhere, at anytime.

RMM3 has two variations - RMM3 Lite and RMM3 Lite-V, which have the same functionality as RMM3. RMM3 Lite currently only can be used on Intel® S3420GPRX, it has not RMM3-dedicated NIC. The management traffic only can go through onboard Integrated BMC-shared NIC (NIC5 on Intel® S3420GPRX) and share network bandwidth with the host system. RMM3 Lite-V module currently only can be used on Intel® SR1640TH server system, its RMM3-dedicated NIC is separated and integrated on server board.
