SATA 7200 rpm drives are our standard high bandwidth hard drive storage options; most workstation models are also available with high performance 10K rpm rotation speeds. Storage capabilities range up to a massive 2.0 TB.

SATA Hard Drives use the SATA II interface running at up to 3 Gb/s or the next generation SATA III interface running at up to 6Gb/s. Actual sustained transfer rates are lower due to command protocol and SATA bus management overhead.
