Equipped with versatile time-saving features and robust functionality, the HP High-Performance Serial ATA EIO Hard Disk lets you securely control when and how documents are printed on your EIO-equipped HP peripherals.

Enhanced productivity

Take advantage of fast, convenient printing. The HP High-Performance Serial ATA EIO Hard Disk enables features that reduce trips to the device, boost productivity, save paper, and safeguard your documents.

Review the first copy before releasing the entire job. Use the Proof-And-Hold option to review the first printed copy before releasing the rest of the print job to the device, preventing costly errors and saving precious time.

Reduce trips between your PC and device. With the Quick Copy feature, print up to 999 additional copies of the last print job directly from the device control panel. Store frequently printed documents on the hard disk. The Stored Jobs feature enables on-demand printing from the device's control panel without any computer involvement.

Powerful performance

Get the most out of your EIO-equipped HP peripheral. This hard disk slides easily into an open EIO slot to operate seamlessly with your device. It offers you fast throughput speeds, high-capacity storage, and unparalleled reliability.

Maximize your investment. Boost the performance of your HP peripheral with this simple, modular EIO hard disk, which can be swapped between compatible, EIO-equipped HP peripherals.

Depend on HP reliability. Backed by a one-year return-to-HP warranty and telephone support, the HP High-Performance Serial ATA EIO Hard Disk delivers the quality and reliability you expect from HP.

Improved security

Enhance the security of your HP peripheral. Private printing ensures that only the user sending the job has access to it at the device. Private print jobs are stored until the user releases them at the control panel with a personal identification number.

Remove any unwanted data from your HP hard drive. With HP secure disk erase, make sure data that you want to eliminate is gone with HP features that securely erase disk drive data, including fast and sanitized erase functionality. HP secure disk erase algorithms are based on U.S. Department of Defense 552022m documentation.
