### GIGABIT PERFORMANCE

The unmanaged switch offers Gigabit speeds to minimize transfer times and greatly enhance the ability to stream high-bandwidth files to connected devices without interference.

### POWER WHERE YOU NEED IT

PoE support lets you deploy network systems such as wireless access, IP telephony, or video surveillance solutions more quickly and at a lower cost, without having to install separate power supplies for individual devices.

### PLUG AND PLAY CONVENIENCE

Linksys unmanaged switches offer a quick and easy solution to extend your office network with plug-and-play installation.

### QUALITY OF SERVICE (QoS) TRAFFIC PRIORITIZATION

QoS traffic prioritization gives precedence to particular devices or activities to ensure mission-critical data throughput is maintained regardless of network congestion. Auto-sensing ports automatically optimize speed for each connected device.
