HP 8GB PC3-10600 (DDR3 1333 MHz) SO-DIMM memory module 1 x 8 GB:

Optimize your HP Business Notebook performance with HP Memory. Random Access Memory (RAM) temporarily stores information from your operating system, applications and data that are in current use. This allows your processor to easily access the critical information that makes your programs run. More RAM allows you to run more programs simultaneously and makes it easier to toggle between programs.

- Boost system performance.
- Support simultaneous opening of large files (presentations, spreadsheets, and graphics, etc) for review and discussion.
- Permit easy toggling between several open applications.
- Avoid system downtime, data losses, and financial impact caused by memory failures.
- Minimize frustration when fast-evolving software requires increasing memory bandwidth.
