SSDSC2KB480GZ01

D3 SSDSC2KB480GZ01 internal solid state drive 2.5" 480 GB Serial ATA III TLC 3D NAND:

### Enhanced Power Loss Data Protection

Enhanced Power Loss Data Protection prepares the SSD for unexpected system power loss by minimizing data in transition in temporary buffers, and uses on-board power-loss protection capacitance to provide enough energy for the SSD firmware to move data from the transfer buffer and other temporary buffers to the NAND, thus protecting system and user data.

### Hardware Encryption

Hardware encryption is data encryption done at the drive level. This is used to ensure that the data stored on the drive is secured from unwanted intrusion.

### End-to-End Data Protection

End-to-End Data Protection ensures integrity of stored data from the computer to the SSD and back.

### Temperature Monitoring and Logging

Temperature Monitoring and Logging uses an internal temperature sensor to monitor and log airflow and device internal temperature. The logged results can be accessed using the SMART command.
